INCREMENTA

“Incremента have played a vital role in advising the development of our start-up programme at the University. The team have provided excellent start-up support to students and graduates at De Montfort University for the past 10 years, both through our Start-up Surgery, Start-up Visa, Start-up Sessions and tailored Enterprise sessions delivered in faculty. The feedback we receive from both students and staff members in regards to the support they offer and workshop delivery is excellent. I would not hesitate in recommending Stuart and the team at Incremента to develop and deliver Enterprise support. //”

“ Incrementa have been truly fantastic over the past two years (and you can quote me on that). You have made the process incredibly simple and stress free and were clearly very effective which could be seen in the students’ improvement. The feedback from all the attendees is always glowing. ”

UNIVERSITY OF  
**LINCOLN**  
UNITED KINGDOM

“Incrementa have worked closely with the entrepreneurship team at UCL providing advice and expertise as tutors and mentors for many of our student start-ups as well as successfully delivering programmes such as the Enterprise Boot Camp that provide students with the chance to engage in enterprise and entrepreneurship and learn a host of transferable skills. We would thoroughly recommend them to deliver enterprise and entrepreneurship activities at universities.”
